

WLX-TOKEN [WLXT] is the symbolic name for the WaveLengthXash Token.

The WaveLengthXash Token is a decentralized marketplace and infrastructural blockchain (node) mining currency, that is gone live on the wavesplatform to disrupt valueless assets and integrate real value to the crypto-space competitively.

As the first [one-stop shop] custom token, leveraging on the wavesplatform, we achieve value integration by facilitating our Lightweight business model for the marketplace implementation through a number of utilities: **LPOS for marketplace commodity & service payments**, **pLPOS Full-node HODLing for infrastructural (node) WAVES mining**, **DAPPS-QMS for VTU vending**, **LPOS-SMS payment method amidst others utility purposes as made explicit on our Light-paper... [Click to see Detailed Whitepaper](#)**

Taking a lead from the default currency on our operational platform (wavesplatform blockchain); the WavelengthXash Token has evolved to integrate value (a rise/boost) to major leading asset, individuals, businesses, and companies through our lightweight business model for the marketplace integration. visit Domain: [wavelengthxash.info](http://wavelengthxash.info) ITO: [wavelengthxash.info/tokensales/wlxt](http://wavelengthxash.info/tokensales/wlxt) Telegram: [wavelengthxash](https://t.me/wavelengthxash) Channel: [WLXTUpdates](https://t.me/WLXTUpdates) and [Team](#)

### Lightweight Point of Sales (LPOS) for Commodity & Service payments in the marketplace.

Our LPOS concept is lightweight marketplace on the go. It takes away all the hassle of ATM mechanisms (credit/debit card), POS machines and reduces the marketplace to a lightweight mechanism that is decentralize to our mobile smartphone usage. Which Our DApps-LposWallet will be release to facilitate ease of trade between marketplace users ([Click to see MVP](#))... also click to [readMore](#)

2

### Private Lease Proof of Stake (pLPOS) FullNode HODL for waves mining & Securing the waves Network

Wavelengthxash will build her lease Full-node on the wavesplatform infrastructure with a targeted balance of 600,000 to 1,000,000WAVES; where it will be mining WAVES currency for profit sharing purposes to stakeholders, on the basis of their wealth of WLX-TOKEN that is vaulted (i.e. HODLing).

As Hodler's, HODL within the cycle of mining, their LposWallet will profit-share 35-40% from the Node cycled mining. ([Click to see MVP](#))... and [click to see Demo User Calculator](#). This feature is being built into our DApps-LposWallet currently and will be release according to roadmap... **Minimum HODL: 5000WLXT**

### Decentralized Applications Solution Services (DAPPS-SERVICES)

WaveLengthXash-Token is the first cryptographic currency with an innovative marketplace. Wavelengthxash Group will be implementing Decentralized Application Solution Services in Countries of our rep handles, for the following integration:

✓ **DAPPS-QMS:** This is a Decentralized-App Quick Mobile Service for vending VTU (Airtime and Data). With WLXT, holders of tokens will be able to buy Airtime, Data for personal mobile phones and 3rd parties in their countries and a minimum of 3 major telecom service providers will be integrated. We shall begin implementation with Nigeria, Kenya and Uganda, other countries will be determine by the size of their communities from such countries. We shall also follow roadmap religiously on this.

✓ **DAPPS-MCI:** This is a future feature meaning Decentralized Applications Solution Services For Merchants & Companies Integration

#### ➤ DAPPS FOR MERCHANT INTEGRATION (DMI)

These are local merchants who will accepts WLX-Token in the future and we shall partner with them completely for LposPayment in the marketplace.

4

### LightWeight Point of Sales-SMS Payment Method (Lpos-SMS):

As our ecosystem revolves, we shall integrate the new concept called Lpos-SMS payment method. This is a further development we shall all look forward to in 2019/20 and beyond which will bring us on a fast-track. It will remove the barrier of internet or poor internet connection for marketplace transactions.

A buyer who finishes picking to cart or buying at point of sales, would just need to send a text message of payment in WLXT to seller's phone number and immediately transaction will be confirmed. Lightweight marketplace is our standard implementation

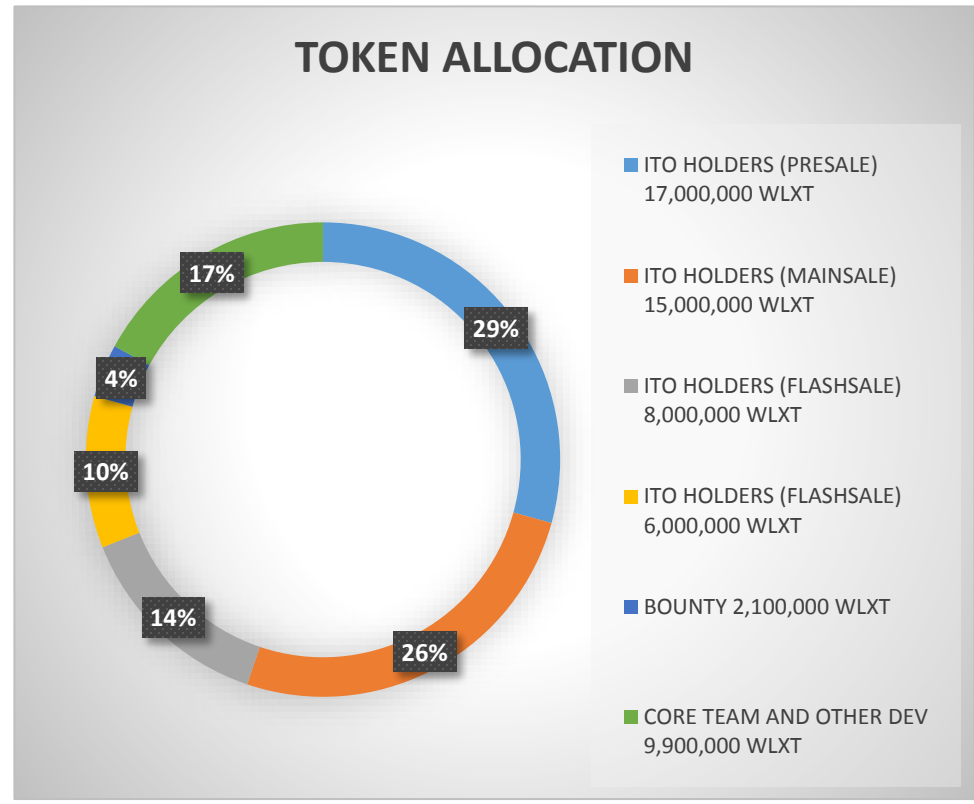

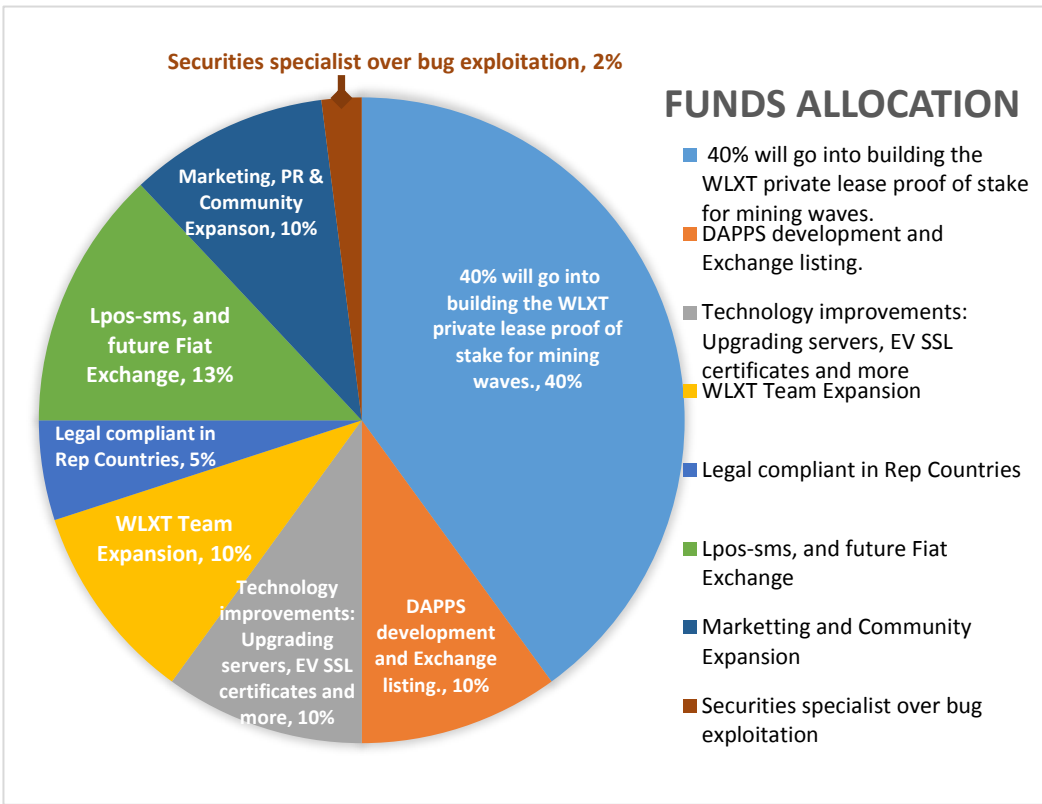

5

### Lightweight Crowdfunding Services (LCS)

Wavelengthxash Group will also seek to partner with new innovations that will required our crowdfunding services within the Wavesplatform for new custom tokens. Our LposWallet can be contracted for future ICO-escrow services. While we shall make it compulsory for users of LposWallet to enjoy free airdrop distributions from such projects. With this, we shall be fulfilling value integration for users of our products concretely.

#### TAKE NOTE OF THESE

- ❖ The accepted currency during the ITO is Bitcoin, WAVES, Ether, Litecoin, Dash, Ripple, BitcoinCash
- ❖ The tokenization is being capped ("Soft Cap") upon the receipt of the fixed softcap equivalent of \$3Million
- ❖ The Token sale period will last 84 days, except Hard Cap is reached sooner.
- ❖ Token Sales has a hard-cap, upon achieving it, and sales will stop and no further contributions will be accepted. The hard cap amount which will be sold in crowdsale is targeted at 5.3Million
- ❖ If the Crowdsale campaign does not reach a SoftCap (as fixed above), knowing that softcap is highly required for full project implementation. Hence, the Dev-team will make Distribution and Lock remaining supply for 5years, during which there will be quaterly releases until Softcap Supply is reached. While the balance for Hardcap will be focusedly use for bounty and contest reward (this is subject to advisory team). VALUE INTEGRATION IS truly tasky without a softcap. BUT WE ARE COMMITTED TO PROJECT.
